TECHNICAL SKILLS

- o **Business Analysis:** Requirements Gathering, Business Process Analysis, Gap Analysis, User Story Writing, Functional Specifications, Workflow Documentation, UAT Planning & Execution, Feature Validation, Source-to-Documentation Traceability
- o **Project Management:** Agile / Scrum, Sprint Planning, Backlog Refinement, Risk Management, Milestone Tracking, Stakeholder Reporting, Change Management Communication
- o **Project & Task Tools:** Jira, Confluence, Notion, Miro, ClickUp
- o **Programming Languages:** JavaScript, TypeScript, Python
- o **Frontend Development:** React, Next.js, HTML, CSS, Tailwind CSS, Responsive UI, Component-Based Development
- o **Vibe Coding & AI Dev:** Rapid Prototyping, Prompt-Assisted Development, AI-Assisted Debugging, Feature Validation, Documentation Generation, Implementation Planning
- o **Data & Databases:** SQL, PostgreSQL, MySQL, MongoDB, Prisma, Power BI
- o **AI Tools:** ChatGPT, Claude, DeepSeek, Perplexity, Cursor, Replit, OpenCode, Figma Make, Co-Pilot
- o **Version Control:** Git, GitHub, Bitbucket
- o **Design & Diagramming:** Figma, Lucidchart, Canva, Workflow Diagrams, Wireframe Review
- o **Cloud & Dev Environment:** Microsoft Azure, Google Cloud Platform, Amazon Web Services, Docker Compose, Local Development Environments
- o **Productivity Tools:** Microsoft Office Suite (Excel, Word, PowerPoint, Access), Airtable, Google Workspace
- o **IDEs & Code Editors:** Visual Studio Code, Antigravity, IntelliJ IDEA
- o **Networking:** Cisco Packet Tracer

PERSONAL SKILLS

- o Analytical and detail-oriented; evaluates assumptions, identifies root causes, and makes data-informed recommendations.
- o Organized and self-directed; manages multiple deliverables and structured work plans effectively in a remote, independent setting.
- o Strong communicator; conveys complex requirements clearly to both technical and non-technical stakeholders through written and verbal channels.
- o Collaborative; facilitates productive cross-functional discussions and builds effective working relationships across teams.
- o Adaptable and solutions-focused; transitions smoothly between shifting priorities and responds constructively to change.
- o Proactive continuous learner; actively adopts new tools, methodologies, and AI workflows to improve personal and team output.
- o Reliable and consistent; meets deadlines independently without supervision and maintains quality across concurrent workstreams.

EXPERIENCE

Business System Analyst | Edufied Pte Ltd | Remote

January 2026 – Present

- o Elicit, analyze, and document business and system requirements through stakeholder interviews, process walkthroughs, and document review to bridge business needs with system solutions.
- o Create and maintain functional documentation, including specifications, workflow diagrams, process maps, user stories, acceptance criteria, and business solution write-ups used as source-of-truth references by Product, Development, QA, and stakeholder reviewers.
- o Support Agile delivery through daily stand-ups, sprint planning, backlog refinement, sprint reviews, and requirements walkthroughs; track deliverables, blockers, and priorities using Jira and Confluence.
- o Identify workflow gaps, process inefficiencies, documentation inconsistencies, and unclear requirements; propose improvements that reduce ambiguity and improve cross-team communication.
- o Collaborate with Product, Development, and QA teams to clarify requirements, validate delivered features, review expected behavior, and confirm outputs against acceptance criteria.
- o Coordinate UAT activities by mapping test scenarios to requirements, tracking defects, documenting findings, and feeding issues back into the development pipeline.
- o Contribute to AI-assisted front-end prototyping and implementation review using Claude and ChatGPT to translate requirements into testable interface behavior and reduce validation cycle time.
- o Support product validation by reviewing Playwright end-to-end test coverage, documenting failed workflows, and identifying implementation gaps across analytics, dashboard sync, draft/published states, multi-card behavior, pinned links, and image upload flows.
- o Document and validate project workflows across frontend, backend, authentication, database, image handling, analytics, QR generation, and QA coverage to support product readiness, implementation review, and source-to-documentation alignment.

PROJECTS

Ticket Monitoring System – Saint Louis University, Center for Culture and the Arts

Academic Project | 2025

- o Led end-to-end project planning and delivery for a centralized platform covering ticket allocation, sales tracking, and remittance logging - owning scope, timeline, and stakeholder communication from requirements intake to documentation delivery.
- o Conducted stakeholder research and user interviews to define system requirements, map workflows, and align the proposed solution to real organizational needs.
- o Produced comprehensive project documentation including requirements specifications, workflow diagrams, and user guides to support development, QA testing, and end-user adoption.
- o Coordinated deliverables across a student team using structured task management, ensuring milestones were met and outputs were accurate and stakeholder-ready.
